## Projects

---

**Portfolio** | *React.js, Vite js*

- I created my own portfolio with the help of ReactJS and Vite, in which I have added all the details about myself, and told about my services and created my contact form.
- This project is a single page web application, in which I made many different components and resourced them. I also used props and hooks in this
- Apart from this, I have created one or two more portfolios which are also responsive and I have created them with the help of HTML, CSS and JavaScript

**Coffee Shop** | *HTML, CSS, Java Script*

- I created a Coffee shop website which is also responsive. I have added information about the coffee's menu and price. You can contact us and get a table book for yourself.
- In this, I have told about different services of Coffee, and have added contact details and location in the last

**Netflix and Amazon Clone** | *HTML, CSS*

- I looked at the front page of Netflix and Amazon and created a page like it, which looks very much like it. The headers and content of both are also the same.
- In Amazon's project, I added all Amazon's products and put its movies content in Netflix.

## Technical Skills

---

: HTML, CSS, Java Script, React JS, Vite JS.

: Bootstrap, Tailwind CSS, WordPress.
