- Completed a comprehensive 1-year web development training program focused on front-end and full-stack technologies. Developed multiple projects, including dynamic and responsive websites
- Gained hands-on experience with HTML, CSS, JavaScript, React.js, and modern libraries/frameworks such as Tailwind CSS and Bootstrap.

Projects

Restaurant | *React.js, Vite* js
- Developed a fully responsive, multi-page restaurant website using React.js, ensuring a seamless user experience across all devices.
- Key features include a dynamic menu, services page, image gallery, and a reservation system that allows users to book tables directly from the site.
- Integrated a blog section to keep customers updated with the latest restaurant news and promotions and Designed a contact page with Google Maps integration and responsive forms for customer inquiries.

Todo App | *React.js, CSS*
- Designed and developed a single-page To-Do application using React.js, focusing on efficient state management and a dynamic user interface.
- Implemented core features such as task creation, editing, deletion, and completion tracking using React's state management and component architecture.
- Utilized React Hooks (e.g., useState, useEffect) to manage application state and handle side effects, ensuring a responsive and interactive user experience.

Netflix and Amazon Clone - UI | *HTML, CSS*
- Designed and developed a Netflix front page clone using HTML and CSS, emulating the visual layout and user interface of Netflix's streaming platform.
- Replicated key elements such as movie banners, carousels, and featured sections using advanced CSS techniques, including Flexbox and Grid for responsive layouts.
- Created a responsive design to ensure the application rendered effectively on various devices and screen sizes, maintaining usability and visual appeal.
